

Tutorial: Assigning Keywords to Your Layouts by Ann-Maree Johns

By adding DSP product keywords to your layouts, they will be linked to the DSP store products you used. This way, when people are looking in store and click on the link "see layouts using this product" they will be able to see all the ways the CD, album, kit, word art, or alpha has been used in layout

Model: DL-KL-K-theDance

[Click here to see layouts using this product](#)

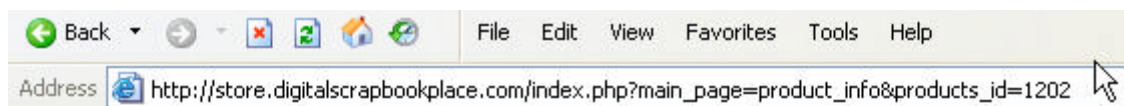

What are product keywords? Where do I find them? (2 ways)

a) Thanks to the hard work of Designer Kim Liddiard, here is a DSP product list with corresponding keywords.

Keywords by Category: <http://www.digitalscrapbookplace.com/ads/keywordsbycategory.php>

b) Another way is when looking at a specific product in store yo

u will see a corresponding keyword/number in the address bar above the product. For example, this is Kim Liddiard's "The Dance Kit" (link in address bar):

http://store.digitalscrapbookplace.com/index.php?main_page=product_info&products_id=1202
The product keyword/number is at the end, 1202.

How do I add product keywords to my layouts?

When uploading layouts to your gallery, simply add the product keywords. You would normally add to describe your layout such as dance pink kim girl.

Simply add your the product number followed by dsp. For example, if you were using Kim's Dance would add 1202dsp. Please note the dsp after the product number.

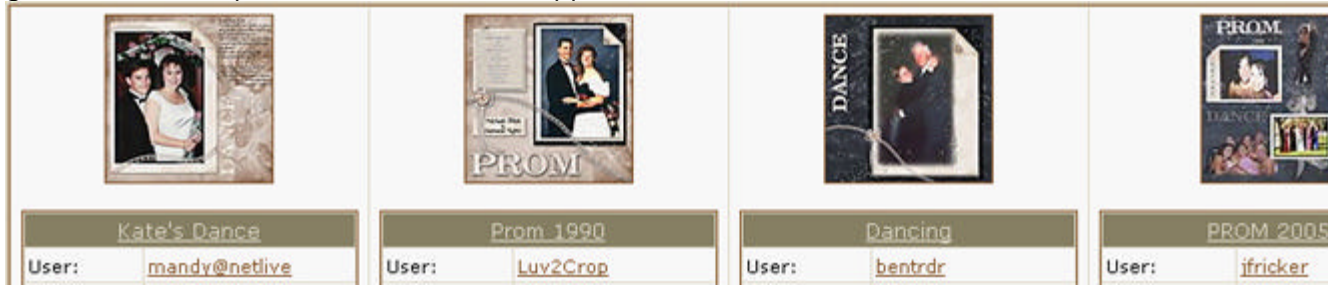

How do I add product keywords to my layouts already uploaded?

Underneath your layout there is a clickable link called Edit. Click on this and you will be taken to the Image dialogue box. Locate the box called keywords and place your keyword/number here and they become clickable links other scrappers can use to quickly find other layouts made with the same product in the DSP Shop. Still leave your descriptive words in here as well.

Keywords example: 1202dsp kim liddiard dance pink prom

Keywords:	1202dsp kim liddiard de
Program:	
Fonts:	

Then, when users click to see layouts using this product, they will see the versatility of it and be able to get ideas and inspiration from other scrappers!
