(A) Window bar allows you to minimize, maximize and close program. *(double clicking bar will switch between minimizing and maximizing)*

(B) Menu bar Contains menus organized by tasks.

(C) Options bar Provides options for using a tool.

(D) Toolbox Contains tools for creating and editing images.

(E) The status bar is located at the bottom of every document window and displays useful information—such as the current magnification and file size of the active image, and brief instructions for using the active tool. The status bar also displays Version Cue information if you have Version Cue enabled.

(F) Active image area Displays the active open file. The window containing an open file is also called the document window.

(G) Opens Adobe Bridge.

(H) Palette well Helps you organize the palettes in your work area. You can drag palettes into this area to make them more accessible.

(I) Palettes Help you monitor and modify images. You can customize the palette locations in the workspace by dragging them to where you would like them to be.
